cyber·Fund 3of5

About processes

- Effective and efficient processes is important
- Google Docs - no, Github - yes
  - Why not
    - Proprietary formats
    - Don't allow to manage processes
    - Impossible to track atomic changes
  - Docs => Markdown
  - Tables => Boards or blockchain registries
  - Presentations => Markdown
  - Google Docs should die in a month
- One Github and Slack to rule them all
- Best Practise
  - Feature branches — nemo
  - Wiki — gleb
  - State of process — akoval
  - Releases — gleb
  - Pull requests with code review

About teams

- Should live on Github
- Multisig
- Base 1 page contract
- Forecast monthly
- Money monthly
- Team is autonomous

About delivery

- Issues and boards is everything
- Organisation level / repo level projects
- Board can track any process

About Culture

- Quality is the King
- Like Darpa but digital

Accounts

- Ethereum
- Bitcoin
- Bitshares

- Share in cybernomics 1/5000
- Terms: Tokens now / Tokens later

Questions

- Graciola/Estonia legal
- cyber·Rating 2of3 30%
